

# Install ezFramer Software

## How to Download ezFramer Software

1. Go to [www.ezFramer.com](http://www.ezFramer.com)
2. Click on Downloads & Support
3. Follow the on screen instructions to download either the demo version or ezFramer Express.
4. Once installed onto your computer double click the ezFramer shortcut icon located on your desktop.
5. If using ezFramer Express, you will be required to register your software when you first start the program. Use the information sent to your email inbox when you registered. If you do not receive this email, check your spam filters, or register again.

## Computer Requirements

Windows 2000 or greater. ezFramer will run on Vista machines, but you must follow the additional required steps for it to work properly. This information can be found online at [www.ezFramer.com](http://www.ezFramer.com) under our Download & Support section.

ezFramer is not compatible with Mac at the time of this writing the manual, unless it is the Mac/Intel processor.

## Windows Vista

If you are using ezFramer on a computer with the Windows Vista Operating System, you will need to make some administrative setting changes once ezFramer is installed, otherwise it will not function properly. Once these settings are complete, ezFramer will run properly. Please see the Section: **ezFramer on a Window Vista Operating System**
